

# SAFETY DATA SHEET

Version #: 04 Issue date: 02-06-2014 Revision date: 11-15-2023 Supersedes date: 05-20-2019

#### SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier		
Trade name or designation of the mixture	NYOGEL 774F-MS	
Registration number	-	
Synonyms	None.	
Product code	NYOGEL 774F-MS	
1.2. Relevant identified uses of t	he substance or mixture and us	ses advised against
Identified uses	Lubricating grease	
Uses advised against	None known.	
1.3. Details of the supplier of the	safety data sheet	
Supplier		
Company name	Nye Lubricants, Inc.	
Address	12 Howland Road	
	Fairhaven, MA 02719	
	United States	
Division		
Telephone	General Assistance	+1-508-996-6721
e-mail	sds@nyelubricants.com	
Contact person	Not available.	
1.4. Emergency telephone number	3E Online	+1-800-451-8346

### SECTION 2: Hazards identification

#### 2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

#### Classification according to Regulation (EC) No 1272/2008 as amended

This mixture does not meet the criteria for classification according to Regulation (EC) 1272/2008 as amended.

#### 2.2. Label elements

#### Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms	None.
Signal word	None.
Hazard statements	The mixture does not meet the criteria for classification.
Precautionary statements	
Prevention	Observe good industrial hygiene practices.
Response	Wash hands after handling.
Storage	Store away from incompatible materials.
Disposal	Dispose of waste and residues in accordance with local authority requirements.
Supplemental label information	None.
2.3. Other hazards	This mixture does not contain substances assessed to be vPvB / PBT according to Regulation (EC) No 1907/2006, Annex XIII. The product does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

#### SECTION 3: Composition/information on ingredients

#### 3.2. Mixtures

General information Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
1-Decene, homopolymer, hydrogenated	10 - < 20	68037-01-4 500-183-1	-	-	
	fication: Asp. Tox.				
1-DODECENE POLYMER W 1-DECENE, HYDROGENATE		151006-60-9 436-190-0	-	-	
	fication: Asp. Tox.				
1-DODECENE, POLYMER W 1-DECENE AND 1-OCTENE, HYDROGENATED		163149-28-8	-	-	
	ication: Asp. Tox.	I;H304			
ALKYLATED DIPHENYLAMI	-	Trade Secret	-	-	
Classi	ication: Repr. 2;H3	- 61, Aquatic Chronic	3;H412		
Other components below repo levels	ortable 40 - < 50				
ist of abbreviations and symbol ATE: Acute toxicity estimate. M: M-factor PBT: persistent, bioaccumular vPvB: very persistent and ver All concentrations are in percent substance has been assigned	tive and toxic substa y bioaccumulative se ent by weight unless	nce. ubstance. ingredient is a gas.	Gas concentrations are in p	ercent by volume	. #: This
composition comments	•	H-statements is disp	layed in section 16.		
SECTION 4: First aid mea	sures				
General information			are of the material(s) involve	ed, and take preca	autions to
.1. Description of first aid meas	•				
Inhalation		Call a physician if sy	mptoms develop or persist.		
Skin contact	Wash off with soa	p and water. Get me	dical attention if irritation de	velops and persis	ts.
Eye contact			if irritation develops and p		
Ingestion	Rinse mouth. Get	medical attention if s	ymptoms occur.		
.2. Most important symptoms nd effects, both acute and elayed	Exposure may ca	use temporary irritation	on, redness, or discomfort.		
I.3. Indication of any mmediate medical attention and special treatment needed	Treat symptomation	cally.			
SECTION 5: Firefighting r	neasures				
eneral fire hazards		explosion hazards n	oted.		
i.1. Extinguishing media Suitable extinguishing media			r. Carbon dioxide (CO2).		
Unsuitable extinguishing media	Do not use water	et as an extinguishe	r, as this will spread the fire		
.2. Special hazards arising rom the substance or mixture	During fire, gases	hazardous to health	may be formed.		
.3. Advice for firefighters					
Special protective equipment for firefighters	Self-contained bre	athing apparatus an	d full protective clothing mu	st be worn in case	e of fire.
Special fire fighting procedures	Use water spray t	o cool unopened con	tainers.		
Specific methods	Use standard firef	ighting procedures a	nd consider the hazards of	other involved ma	terials.
SECTION 6: Accidental re	lease measure				

6.1. Personal precautions, protective equipment and emergency procedures For non-emergency Wear appropriate personal protective equipment. personnel

SECTION 8: Exposure controls/personal protection         8.1. Control parameters         Occupational exposure limits         Switzerland. SUVA Grenzwerte am Arbeitsplatz         Components       Type       Value       Form         Molybdenum disulphide (CAS 1317-33-5)       TWA       10 mg/m3       Inhalable fraction.         Biological limit values       No biological exposure limits noted for the ingredient(s).       Recommended monitoring procedures.       Follow standard monitoring procedures.         Derived no effect levels (DNELs)       Not available.       Not available.       Not available.         OMELS       Not available.       Not available.       Seconsmended exposure limits in the sponge level.         Appropriate engineering controls       Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain ariborne levels below recommended exposure limits have not been established, maintain ariborne levels to an acceptable level.         Individual protection measures, such as personal protective equipment though be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.         Eye/face protection       Wear appropriate chemical resistant gloves.         - Other       Wear apropriate thermal protective equipment.	For emergency responders	Keep unnecessary personnel away. F	or personal protection, see se	ection 8 of the SDS.

Solid.

Solid.

Physical state

Form

Colour	Not available.
Odour	Not available.
Melting point/freezing point	2375 °C (4307 °F) estimated
Boiling point or initial boiling point and boiling range	450 °C (842 °F) estimated
Flammability (solid, gas)	Not available.
Flash point	> 200,0 °C (> 392,0 °F) ASTM D-92
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
рН	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Vapour pressure	0,00001 hPa estimated
Vapour density	Not available.
Relative density	Not available.
Particle characteristics	Not available.
9.2. Other information	
9.2.1. Information with regard to physical hazard classes	No relevant additional information available.
9.2.2. Other safety characteristi	cs
Density	0,93 g/cm³
Explosive properties	Not explosive.
Oxidising properties	Not oxidising.
Shelf life	4 years
Specific gravity	3,83 estimated
SECTION 10, Stability on	d reactivity
SECTION 10: Stability and	
10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions.
10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous reactions	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions. No dangerous reaction known under conditions of normal use.
10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous reactions 10.4. Conditions to avoid	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions. No dangerous reaction known under conditions of normal use. Contact with incompatible materials.
<ul> <li>10.1. Reactivity</li> <li>10.2. Chemical stability</li> <li>10.3. Possibility of hazardous reactions</li> <li>10.4. Conditions to avoid</li> <li>10.5. Incompatible materials</li> <li>10.6. Hazardous decomposition products</li> </ul>	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions. No dangerous reaction known under conditions of normal use. Contact with incompatible materials. Strong oxidising agents. No hazardous decomposition products are known.
10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous reactions 10.4. Conditions to avoid 10.5. Incompatible materials 10.6. Hazardous	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions. No dangerous reaction known under conditions of normal use. Contact with incompatible materials. Strong oxidising agents. No hazardous decomposition products are known.
10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous reactions 10.4. Conditions to avoid 10.5. Incompatible materials 10.6. Hazardous decomposition products SECTION 11: Toxicologic General information	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions. No dangerous reaction known under conditions of normal use. Contact with incompatible materials. Strong oxidising agents. No hazardous decomposition products are known. cal information Occupational exposure to the substance or mixture may cause adverse effects.
10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous reactions 10.4. Conditions to avoid 10.5. Incompatible materials 10.6. Hazardous decomposition products SECTION 11: Toxicologic	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions. No dangerous reaction known under conditions of normal use. Contact with incompatible materials. Strong oxidising agents. No hazardous decomposition products are known. cal information Occupational exposure to the substance or mixture may cause adverse effects.
10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous reactions 10.4. Conditions to avoid 10.5. Incompatible materials 10.6. Hazardous decomposition products SECTION 11: Toxicologic General information Information on likely routes of e	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions. No dangerous reaction known under conditions of normal use. Contact with incompatible materials. Strong oxidising agents. No hazardous decomposition products are known. Cocupational exposure to the substance or mixture may cause adverse effects.
10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous reactions 10.4. Conditions to avoid 10.5. Incompatible materials 10.6. Hazardous decomposition products SECTION 11: Toxicologic General information Information on likely routes of e Inhalation Skin contact	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions. No dangerous reaction known under conditions of normal use. Contact with incompatible materials. Strong oxidising agents. No hazardous decomposition products are known. <b>cal information</b> Occupational exposure to the substance or mixture may cause adverse effects. <b>exposure</b> Prolonged inhalation may be harmful.
10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous reactions 10.4. Conditions to avoid 10.5. Incompatible materials 10.6. Hazardous decomposition products SECTION 11: Toxicologic General information Information on likely routes of en-	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions. No dangerous reaction known under conditions of normal use. Contact with incompatible materials. Strong oxidising agents. No hazardous decomposition products are known. <b>cal information</b> Occupational exposure to the substance or mixture may cause adverse effects. <b>exposure</b> Prolonged inhalation may be harmful. No adverse effects due to skin contact are expected.
10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous reactions 10.4. Conditions to avoid 10.5. Incompatible materials 10.6. Hazardous decomposition products SECTION 11: Toxicologic General information Information on likely routes of e Inhalation Skin contact Eye contact	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions. No dangerous reaction known under conditions of normal use. Contact with incompatible materials. Strong oxidising agents. No hazardous decomposition products are known. <b>cal information</b> Occupational exposure to the substance or mixture may cause adverse effects. <b>exposure</b> Prolonged inhalation may be harmful. No adverse effects due to skin contact are expected. Direct contact with eyes may cause temporary irritation. May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of

Material is stable under normal conditions. No dangerous reaction known under conditions of normal use. Contact with incompatible materials. Strong oxidising agents. No hazardous decomposition products are known. <b>Eal information</b> Occupational exposure to the substance or mixture may cause adverse effects. <b>Exposure</b> Prolonged inhalation may be harmful. No adverse effects due to skin contact are expected. Direct contact with eyes may cause temporary irritation. May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure. Exposure may cause temporary irritation, redness, or discomfort. <b>al effects</b> Not known. Due to partial or complete lack of data the classification is not possible. Due to partial or complete lack of data the classification is not possible.
10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous reactions 10.4. Conditions to avoid 10.5. Incompatible materials 10.6. Hazardous decomposition products SECTION 11: Toxicologic General information Information on likely routes of e Inhalation Skin contact Eye contact Ingestion Symptoms 11.1. Information on toxicologic Acute toxicity Skin corrosion/irritation Serious eye damage/eye irritation Respiratory sensitisation	The product is stable and non-reactive under normal conditions of use, storage and transport. Material is stable under normal conditions. No dangerous reaction known under conditions of normal use. Contact with incompatible materials. Strong oxidising agents. No hazardous decomposition products are known. <b>Eal information</b> Occupational exposure to the substance or mixture may cause adverse effects. <b>Exposure</b> Prolonged inhalation may be harmful. No adverse effects due to skin contact are expected. Direct contact with eyes may cause temporary irritation. May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure. Exposure may cause temporary irritation, redness, or discomfort. <b>Exposure may cause temporary irritation</b> , is not possible. Due to partial or complete lack of data the classification is not possible. Due to partial or complete lack of data the classification is not possible.

Carcinogenicity	Due to partial or complete lack of data the classification is not possible.
Reproductive toxicity	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - single exposure	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - repeated exposure	Due to partial or complete lack of data the classification is not possible.
Aspiration hazard	Due to partial or complete lack of data the classification is not possible.
Mixture versus substance information	No information available.
11.2. Information on other hazar	ds
Endocrine disrupting properties	The product does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.
Other information	Not available.
SECTION 12: Ecological in	nformation
12.1. Toxicity	Based on available data, the classification criteria are not met for hazardous to the aquatic environment.
12.1. Toxicity 12.2. Persistence and degradability	•
12.2. Persistence and	environment.
12.2. Persistence and degradability	environment.
12.2. Persistence and degradability 12.3. Bioaccumulative potential Partition coefficient	environment. No data is available on the degradability of any ingredients in the mixture.
12.2. Persistence and degradability 12.3. Bioaccumulative potential Partition coefficient n-octanol/water (log Kow)	environment. No data is available on the degradability of any ingredients in the mixture. Not available.
12.2. Persistence and degradability 12.3. Bioaccumulative potential Partition coefficient n-octanol/water (log Kow) Bioconcentration factor (BCF)	environment. No data is available on the degradability of any ingredients in the mixture. Not available. Not available.
12.2. Persistence and degradability 12.3. Bioaccumulative potential Partition coefficient n-octanol/water (log Kow) Bioconcentration factor (BCF) 12.4. Mobility in soil 12.5. Results of PBT and vPvB	environment. No data is available on the degradability of any ingredients in the mixture. Not available. Not available. No data available. This mixture does not contain substances assessed to be vPvB / PBT according to Regulation
12.2. Persistence and degradability 12.3. Bioaccumulative potential Partition coefficient n-octanol/water (log Kow) Bioconcentration factor (BCF) 12.4. Mobility in soil 12.5. #### **SECTION 13: Disposal considerations**

13.1. Waste treatment methods	
Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site.
Special precautions	Dispose in accordance with all applicable regulations.

## SECTION 14: Transport information

ADR

14.1. - 14.6.: Not regulated as dangerous goods.

#### RID

14.1. - 14.6.: Not regulated as dangerous goods.

#### ADN

14.1. - 14.6.: Not regulated as dangerous goods.

## 

14.1. - 14.6.: Not regulated as dangerous goods.

### IMDG

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Maritime transport in bulk Not applicable.

according to IMO instruments

## SECTION 15: Regulatory information

•	ronmental regulations/legislation specific for the substance or mixture
EU regulations Regulation (EC) No. 100	5/2009 on substances that deplete the ozone layer, Annex I and II, as amended
Not listed. Regulation (EII) 2019/10	21 On persistent organic pollutants (recast), as amended
Not listed.	21 on persistent organic ponutants (recust), us anended
Regulation (EU) No. 649	/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended
Not listed. <b>Regulation (EU) No. 649</b> Not listed.	/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended
Regulation (EU) No. 649 Not listed.	/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended
Regulation (EU) No. 649 Not listed.	/2012 concerning the export and import of dangerous chemicals, Annex V as amended
	/2006 Annex II Pollutant Release and Transfer Registry, as amended
